

## Technical

Solaria Universal hydro painting is a multi-mineral milk vinegar bicomponent for application, it must be mixed with the fixative Ecobios LED Plus the extent of l. 5 fixative with l. 14 Solaria Universal.

The color of water painting, as a result of that blending consists of an emulsion lt. Equivalent to 19 kg. 25 per drum, using a bottle of additives to provide color in a pre-l. 0075 standard in shades: red, yellow, brown, green and gray.

The two proposals are shades of mixing of 25 kg of Solaria Universal, premixed with fixative Ecobios LED Plus, respectively, with a bottle of lt. 0.075 with one clear and 2 liter bottles. 0.075 the most intense.

Additional shades can be obtained at the user dosandole to measure multiple shades proposals.

## Measures:

The reduction of energy refraction dell'idropittura milk-vinegar Solaria Universal is directly proportional to the opacity of color:

- **make sure, before making the application, the persistence of a climate optimum drying of hydro pittura lasting from 4-5 days;**
- **not to apply any surplus hydro colored paintings after days of mixing with the hydro painting Solaria Universal.**
